Safety data sheet

SECTION 1. Identification of the substance/mixture and of the company/enterprise

		1 v 1			
1.1	Identification				
	Code	ESS20072017BOR			
	Product name	OIÈ RESSENZA BORDEAUX			
	Description	Super-concentrated watery mixture of natural and synthetic substances with polyvalent function.			
1.2	Recommended use and restr	ictions on use			
	Use	Professional use only.			
		To be used for detergency, sanitation, deodorization, fragrance giving and dust removal from environments and surfaces.			
		Usage : 1 spray (1 ml) of product in 1 l of water to clean and deodorize any washable surface; 1 spray into drains to neutralize unpleasant odours; sprayed one time on a cloth to dust furniture and frequently used objects.			
		RESTRICTIONS ON USE:			
		DO NOT directly spray it in the environment, but vaporize it from a distance of 20 cm on a surface/tissue/water container to minimize the possible insurgence of respiratory			
		allergenic reactions.			
		DO NOT breath the vapour or the aerosol of pure product.			
		It is recommended NOT to use the product for purposes other than those provided.			
1.3	Details of the safety data sheet supplier				
	Name	RUBINO CHEM S.r.I.			
	Full address	Via Vigili del Fuoco Caduti in Servizio, 14/s INT.4			
	District and Country	70026 Modugno			
		tel. (+39) 080 5035348			
		Fax (+39) 080 5008545			
	E-mail of the responsible person for the Safety Data Sheet	customerservice@rubinochem.it			
	Manufacturer	RUBINO CHEM S.r.l.			
1.4	Emergency telephone number	er			
		United Kingdom:			
	For urgent inquiries refer to:	NHS 111 service if you urgently need medical help or advice but it's not a life-			

SECTION 2. Hazards identification

For urgent inquiries refer to:

2.1 Classification of the substance or mixture

999

The product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of EC Regulation 1907/2006 and subsequent amendments.

threatening situation. For immediate, life-threatening emergencies, continue to call

Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

SECT	TION 4. First aid	, , , -			
	Description of first aid measures				
4.1	EYES EYES	Remove contact le		ith plenty of water for at least 15 minutes, cal advice.	
	Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.				

Precautions for safe handling

Olè RESSENZA BORDEAUX

Review n. 5 Reviewed 21/05/2021 Printed 21/05/2021 Page 4 di 10

	'			
	INHALATION	Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately.		
	INGESTION	Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorized by a doctor.		
4.2		nt symptoms and effects, both acute and delayed d effects caused by the contained substances, see chap. 11.		
	<u> </u>	case of emergency of medical and special treatments		
4.3	Information not av			
SECT	TION 5. Firefight	tingmeasures		
	Extinguishing			
5.1	SUITABLE EXTINGUISHIN EQUIPMENT	Extinguishing substances are: carbon dioxide and chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.		
	UNSUITABLI EXTINGUISHIN EQUIPMENT	Water is not effective for putting out fires but can be used to cool containers exposed to flames to		
5.2	Special hazard	ds arising from the substance or mixture		
J.2		SED BY EXPOSURE IN THE EVENT OF FIRE of the product are involved in a fire, they can make it considerably worse. Do not breathe combustion		
5.3	Advice for fire			
0.5	GENERAL INFORMATION In the case of fire, use jets of water to cool the containers to prevent the risk of explosions (product decomposition and excess pressure) and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Remove all containers containing the product from the fire, if it is safe to do so.			
	SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS Normal firefighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).			
SECT	TION 6. Accident	tal release measures		
	Personal nrece	autions, protective equipment and emergency procedures		
6.1	Block the leakage Wear suitable pro sheet) to prevent	if there is no hazard. tective equipment (including personal protective equipment referred to under Section 8 of the safety data any contamination of skin, eyes and personal clothing. These indications apply for both processing staff d in emergency procedures.		
6.2	Environmenta The product must			
	The product must not penetrate into the sewer system or come into contact with surface water or ground water.			
6.3	Methods and material for containment and cleaning up Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.			
6.4	Reference to o			
· · ·	Any information of	on personal protection and disposal is given in sections 8 and 13.		
SECT	TION 7. Handling	g and storage		

Review n. 5 **Reviewed** 21/05/2021 **Printed** 21/05/2021 Page 5 di 10

7.1	Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation,
	vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid
	bunching of electrostatic charges. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal
	protective equipment before entering places in which people eat. Avoid leakage of the product into the environment.

7.2 Conditions for safe storage, including any incompatibilities

Store only in the original container. Store in a well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

7.3 **Specific end use(s)** Information not available.

SECTION 8. Exposure controls/personal protection

8.1 Control parameters

Information not available.

8.2 **Exposure controls**

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type B filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

SECTION 9. Physical and chemical properties.
