# Safety data sheet

SECT	SECTION 1. Identification of the substance/mixture and of the company/enterprise				
I	Identification				
	Code:	ESS24032013DIA			
	Product name	OIÈ RESSENZA DIAMOND			
	<b>D</b>	Super-concentrated watery mixture of natural and synthetic substances with			
	Description	polyvalent function.			
1.2	Recommended use and restr	ictions on use			
	Use	Professional use only.			
		To be used for detergency, sanitation, deodorization, fragrance giving and dust			
		removal from surface and environments.			
		Usage: 1 spray (1 ml) of product in 1 l of water to clean and deodorize any			
		washable surface; 1 spray into drains to neutralize unpleasant odours; sprayed			
		one time on a rug to dust furniture, furnishings and frequently used objects.			
		RESTRICTIONS ON USE:			
		DO NOT vaporize pure in the environment, but vaporize it from a distance of			
		20 cm on a surface/rug/water container to minimize a possible insurgence of			
		respiratory allergenic reaction.			
		DO NOT breath directly the vapour or the aerosol of pure product.			
		It is recommended NOT use the product for purposes other than those provided.			
1.3	Details of the supplier of the	safety data sheet			
	Name	RUBINO CHEM S.r.l.			
	Full address	Via Vigili del Fuoco Caduti in Servizio, 14/s INT.4			
	District and Country	70026 Modugno

**Review n.** 5 **Reviewed** 16/03/2021 **Printed** 16/03/2021 Page 5 di 11

5.3 GENERAL INFORMATION

In the case of fire, use jets of water to cool the containers to prevent the risk of explosions (product decomposition and excess pressure) and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Remove all containers containing the product from the fire, if it is safe to do so.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

#### **SECTION 6. Accidental release measures**

Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

6.2 **Environmental precautions** 

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3 Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Check incompatibility for container material in section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## **SECTION 7. Handling and storage**

Precautions for safe handling

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat. Avoid leakage of the product into the environment.

7.2 Conditions for safe storage, including any incompatibilities

Store only in the original container. Store in a well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

7.3 **Specific end use(s)** 

Information not available.

## **SECTION 8. Exposure controls/personal protection**

8.1 Control parameters

### ALPHA-HEXYLCINNAMALDEHYDE

Predicted no-effect concentrati	on - PNEC.
---------------------------------	------------

0,03 mg/L	Normal value in fresh water
0,003 mg/L	Normal value in marine water
47,7 mg/Kg	Normal value for fresh water sediment
4,77 mg/Kg	Normal value for marine water sediment
9.51 mg/Kg	Normal value for the terrestrial compartment

Health - Derived no-effect level - DNEL / DMEL

Effects on workers

Review n. 5 Reviewed 16/03/2021 Printed 16/03/2021 Page 6 di 11

Route of exposure	Acute local	Acute systemic	Chronic local	Chronic
				systemic
Inhalation	6,28 ppm	VND	VND	0,078 ppm
Skin	VND	VND	VND	18,2 mg/L
VND = hazard identifi	ed but no DNEL/PNEC av	ailable ; NEA = no exp	osure expected ; NPI	
= no hazard identified.				

## 8.2 **Exposure controls**

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

#### HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

#### SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

#### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type B filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

#### **EYE PROTECTION**

Wear airtight protective goggles (see standard EN 166).

#### **ENVIRONMENTAL EXPOSURE CONTROLS**

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

### **SECTION 9. Physical and chemical properties.**

## 9 1 Information on basic physical and chemical properties

Appearance	WHITE LIQUID
Odour	SCENTED FRAGRANCES
Odour threshold	Not available

#### Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product. This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.
