Safety data sheet

	•				
SECT	SECTION 1. Identification of the substance/mixture and of the company/enterprise				
1.1	Identification				
	Code	ESS30042011ECR			
	Product name	Olè RESSENZA ECRU			
	D	Super-concentrated watery mixture of natural and synthetic substances with			
	Description	polyvalent function.			
1.2	Recommended use and restr	ictions on use			
	Use	Professional use only.			
		To be used for detergency, sanitation, deodorization, fragrance giving and dust			
		removal from environments and surfaces.			
		Usage : 1 spray (1 ml) of product in 1 l of water to clean and deodorize any washable			
		surface; 1 spray into drains to neutralize unpleasant odours; sprayed one time on a			
		cloth to dust furniture and frequently used objects.			
		RESTRICTIONS ON USE:			
		DO NOT directly spray it in the environment, but vaporize it from a distance of 20 cm			
		on a surface/tissue/water container to minimize the possible insurgence of respiratory			
		allergenic reactions.			
		DO NOT breath the vapour or the aerosol of pure product.			
		It is recommended NOT to use the product for purposes other than those provided.			
1.3	Details of the supplier of the				
	Name	RUBINO CHEM S.r.l.			
	Full address	Via Vigili del Fuoco Caduti in Servizio, 14/s INT.4			
	District and Country	70026 Modugno			
		tel. (+39) 080 5035348			
		Fax (+39) 080 5008545			
	E-mail of the responsible person	customerservice@rubinochem.it			
	for the Safety Data Sheet	DUDDIO CHEMO 1			
	Manufacturer	RUBINO CHEM S.r.1.			
1.4	Emergency telephone number	er			
		United Kingdom:			
	For urgent inquiries refer to:	NHS 111 service if you urgently need medical help or advice but it's not a life-			
		threatening situation. For immediate, life-threatening emergencies, continue to call			
		999.			
SECT	TION 2. Hazards identification				
2.1	Classification of the substance	ce or mixture			
		dous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and			
	subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provis EC Regulation 1907/2006 and subsequent amendments.				
	Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of th sheet.				
	Hazard classification and indication:				
	AMERICA CONSTRUCTION AND ANGIOGRAPHICAL

Exposure controls

8.1

Olè RESSENZA ECRU

Review n. 5 **Reviewed** 21/05/2021 **Printed** 21/05/2021 Page 4 di 9

Special hazards arising from the substance or mixture 5.2 HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE If large quantities of the product are involved in a fire, they can make it considerably worse. Do not breathe combustion products. Advice for firefighters 5.3 GENERAL INFORMATION In the case of fire, use jets of water to cool the containers to prevent the risk of explosions (product decomposition and excess pressure) and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Remove all containers containing the product from the fire, if it is safe to do so. SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS Normal firefighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137). **SECTION 6. Accidental release measures** Personal precautions, protective equipment and emergency procedures 6.1 Block the leakage if there is no hazard. Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures. **Environmental precautions** 6.2 The product must not penetrate into the sewer system or come into contact with surface water or ground water. Methods and material for containment and cleaning up 6.3 Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13. Reference to other sections 6.4 Any information on personal protection and disposal is given in sections 8 and 13. **SECTION 7. Handling and storage Precautions for safe handling** 7.1 Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat. Avoid leakage of the product into the environment. Conditions for safe storage, including any incompatibilities 7.2 Store only in the original container. Store in a well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details. Specific end use(s) 7.3 Information not available. **SECTION 8. Exposure controls/personal protection**

Review n. 5 **Reviewed** 21/05/2021 **Printed** 21/05/2021 Page 5 di 9

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type B filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

SECTION 9. Physical and chemical properties.

9.1 Information on basic physical and chemical properties

Appearance	WHITE LIQUID
Odour	scents
Odour threshold	Not available
pH	6.6± 0.1
Melting point / freezing point	Not available
Initial boiling point or boling range	$100.5 \pm 0.5 (^{\circ}\text{C})$
Flash point	> 60 °C
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/ Lower inflammability or	Not available.
explosive limit	
Vapour pressure	Not available.
Vapour density	1.003 ± 0.001
Relative density	Not available.
Solubility	Solubility in water
Partition coefficient: n-octanol/water	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available
Viscosity	1.8 ± 0.1
Explosive properties	Not available.
Oxidising properties	Not available.

9.2 Other information					
VOC (Directive 1999/13/CE) $\mid 0.07 \pm 0.02 \text{(g COV / g sample)}$					
(equal to: 7% ± 2%)					
SECTION 10. Stability and reactivity.					
10.1 Reactivity					
There are no particular risks of reaction with other substances in normal conditions of use.					
10.2 Chemical stability					
The product is stable in normal conditions of use and storage.					
10.3 Possibility of hazardous reactions.					
No hazardous reactions are foreseeable in normal conditions of use and storage.					
10.4 Conditions to avoid.					
None in particular. However the usual precautions used for chemical products should be respected.					
10.5 Incompatible materials.					
Information not available.					
10.6 Hazardous decomposition products.					
Information not available.					
SECTION 11. Toxicological information					
Information on toxicological effects					
In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the					
substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to					
take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.					
Upon contact with skin, this product causes sensitization (dermatitis). Dermatitis derives from skin irritation on the areas					
which repeatedly come into contact with the sensitizing agent. Cutaneous lesions may include: erythemas, edemas, papules,					
vesicles, pustules, scurvies, ulcerations and exudative phenomena, whose intensity varies according to illness seriousness and affected areas. Erythemas, edemas and exudative phenomena prevail during the acute phase. Scurfy skin, dryness,					
ulcerations and skin thickening prevail during the chronic phase.					
This product contains sensitizing substance/s and may cause allergic reactions.					
Toxicological information about component substances:					
Sustance:					
LD50 (Oral) 3000 mg/kg Rat					
Sustance: DIHYDROMYRCENOL					
LD50 (Oral) 3600 mg/kg Rat					
LD50 (Dermal) > 5000 mg/kg Rabbit					
SECTION 12. Ecological information.					
This product is dangerous for the environment and the aquatic organisms with long term negative effects on the aquatic environment.					
12.1 Toxicity					
Verdyl Acetate CAS 5413-60-5LC50Pesci15.8 mg/l /96hLepomis macrochirus

	Ingredients in accordance with Regulation CE N.648/2004	Non-ionic and cationic surfactants (<5%); Perfumes (5%-15%); Preservatives: Methylchloroisothiazolinone And Methylisothiazolinone (CAS 55965-84-9) The surfactant (s) contained in this preparation is (are) in compliance with with the biodegradability criteria established by (EC) Regulation Nr . 648/2004 on detergents.		
15.2	Chemical safety assessment			
	No chemical safety assessment has be	en processed for the mixture and the substances it contains.		
SECT	TION 16. Other information			
	Text of hazard (H) indications mentio	ned in section 2-3 of the sheet:		
	Eye Irrit. 2	Eye irritation, category 2		
	Skin Irrit. 2	Skin irritation, category 2		
	Aquatic Acute 1	Hazardous to the aquatic environment, acute toxicity, category 1		
	Aquatic Chronic 1	Hazardous to the aquatic environment, chronic toxicity, category 1		
	Aquatic Chronic 2	Hazardous to the aquatic environment, chronic toxicity, category 2		
	Aquatic Chronic 3	Hazardous to the aquatic environment, chronic toxicity, category 3		
	H319	Causes serious eye irritation.		
	H315	Causes skin irritation.		
	H317	May cause an allergic skin reaction.		
	H400	Very toxic to aquatic life.		
	H410	Very toxic to aquatic life with long lasting effects.		
	H412	Harmful to aquatic life with long lasting effects.		
	Legend:			
	-ADR: European Agreement concerning the carriage of Dangerous goods by Road			
	- CAS NUMBER: Chemical Abstract	Service Number		
	- CE50: Effective concentration (required to induce a 50% effect)			
	-CE NUMBER: Identifier in ESIS (European archive of existing substances)			
	- CLP: EC Regulation 1272/2008			
	- DNEL: Derived No Effect Level			
	- EmS: Emergency Schedule			
	- GHS: Globally Harmonized System of classification and labelling of chemicals			
	- IATA DGR: International Air Transport Association Dangerous Goods Regulation			
	- IC50: Immobilization Concentration 50%			
	- IMDG: International Maritime Code for dangerous goods			
	- IMO: International Maritime Organization			
	- INDEX NUMBER: Identifier in Annex VI of CLP			
	- LC50: Lethal Concentration 50%			
	- LD50: Lethal dose 50%			
	- OEL: Occupational Exposure Level	Atomia as DEACH Description		
	- PBT: Persistent bioaccumulative and toxic as REACH Regulation			
	- PEC: Predicted environmental Concentration			

Review n. 5 **Reviewed** 21/05/2021 **Printed** 21/05/2021 Page 9 di 9

- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA STEL: Short-term exposure limit
- TWA: Time-weighted average exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very Persistent and very bioaccumulative as for REACH Regulation
- WGK: Water hazard classes (German).
