# Safety data sheet

	Safety data sheet				
SECT	ECTION 1. Identification of the substance/mixture and of the company/enterprise				
1.1	Identification				
	Code:	ESS19012013TOP			
	Product name	OIÈ RESSENZA TOPAZ			
		Super-concentrated watery mixture of natural and synthetic substances with			
	Description	polyvalent function.			
1.2 Recommended use and restrictions on use		ctions on use			
	Use	Professional use only.			
		To be used for detergency, sanitation, deodorization, fragrance giving and dust			
		removal from environments and surfaces.			
		<b>Usage</b> : 1 spray (1 ml) of product in 1 l of water to clean and deodorize any washable			
		surface; 1 spray into drains to neutralize unpleasant odours; sprayed one time on a			
		cloth to dust furniture and frequently used objects.			
		RESTRICTIONS ON USE:			
		DO NOT directly spray it in the environment, but vaporize it from a distance of 20			
		cm on a surface/tissue/water container to minimize the possible insurgence of			
		respiratory allergenic reactions.			
		DO NOT breath the vapour or the aerosol of pure product.			
		It is recommended NOT to use the product for purposes other than those provided.			
1.3	Details of the supplier of the	safety data sheet			
	Name	RUBINO CHEM S.r.l.			
	Full address	Via Vigili del Fuoco Caduti in Servizio, 14/s INT.4			
	District and Country	70026 Modugno			
	District and Country	tel. (+39) 080 5035348			
		Fax (+39) 080 5008545			
		Fax (+39) 080 3008343			
	E-mail of the responsible person for	customerservice@rubinochem.it			
	the Safety Data Sheet				
	Manufacturer	RUBINO CHEM S.r.l.			
1.4	Emergency telephone numbe				
		United Kingdom:			
	For urgent inquiries refer to:	NHS 111 service if you urgently need medical help or advice but it's not a life-			
		threatening situation. For immediate, life-threatening emergencies, continue to call 999.			
		777.			
SECT	ΓΙΟΝ 2. Hazards identification				
2.1	Classification of the substance	e or mixture			
2.1	Classification of the substance or mixture  The product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of EC Regulation 1907/2006 and subsequent amendments.  Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this				
	sheet.				
	Hazard classification and indication:				

Review n. 5 Reviewed 21/05/2021 Printed 21/05/2021 Page 2 di 10

	Skin sensitization, categor	ory 1	H317	May cause a	ın allergic skin reaction.
	Hazardous to the aquatic chronic toxicity, category		H412	Harmful to a	equatic life with long lasting effects.
2.2	Label elements.  Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.				
		t to EC Regulati	on 12/2/2008 (CLP) a	nd subsequent amer	idments and supplements.
	Hazard pictograms:		<b>!</b>		
	Signal words:		Warning

4.2	For symptoms and effects caused by the contained substances, see chap. 11.				
4.3	Indication in case of emergency of medical and special treatments  Information not available.				
	Illioillation not available	C.			
SECT	ION 5. Firefighting n	neasures			
5.1	Extinguishing medi	ia			
3.1	SUITABLE EXTINGUISHING EQUIPMENT	Extinguishing substances are: carbon dioxide and chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.			
	UNSUITABLE EXTINGUISHING EQUIPMENT	Do not use jets of water.  Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.			
	Special hazards ari	sing from the substance or mixture			
5.2	HAZARDS CAUSED B	EY EXPOSURE IN THE EVENT OF FIRE e product are involved in a fire, they can make it considerably worse. Do not breathe combustion			
5.0	Advice for firefight	ers			
5.3	Advice for firefighters  GENERAL INFORMATION  In the case of fire, use jets of water to cool the containers to prevent the risk of explosions (product decomposition and excess pressure) and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Remove all containers containing the product from the fire, if it is safe to do so.				
	SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS  Normal firefighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).				
SECT	SECTION 6. Accidental release measures				
6.1	Personal precautions, protective equipment and emergency procedures				
6.1	Block the leakage if there is no hazard.  Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.				
	Environmental pre-	cautions			
6.2		netrate into the sewer system or come into contact with surface water or ground water.			
6.3	Methods and material for containment and cleaning up  Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.  Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.				
6.4 Reference to other sections  Any information on personal protection and disposal is given in sections 8 and 13.					
		onal protection and disposal is given in sections 8 and 13.			
SECT	ION 7. Handling and	l storage			
	Precautions for safe	ehandling			
7.1	Precautions for safehandling  Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat. Avoid leakage of the product into the environment.				

Conditions for safe storage, including any incompatibilities

### **OIÈ RESSENZA TOPAZ**

Review n. 5 Reviewed 21/05/2021 Printed 21/05/2021 Page 5 di 10

	Store only in the original container. Store in a well ventilated place, keep far away from sources of heat, naked flames and
2	sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

# 7.3 **Specific end use(s)** Information not available.

## **SECTION 8. Exposure controls/personal protection**

# 8.1 Control parameters

### Substance:

### ALPHA-HEXYLCINNAMALDEHYDE

Predicted no-effect concentration - PNEC.	
Normal value in fresh water	0,03 mg/L
Normal value in marine water	0,003 mg/L
Normal value for fresh water sediment	47,7 mg/Kg
Normal value for marine water sediment	4,77 mg/Kg
Normal value for the terrestrial compartment	9.51 mg/Kg

### Health - Derived no-effect level - DNEL / DMEL

Effects on workers	$\mathbf{E}\mathbf{f}$	fects	Λn	workers
--------------------	------------------------	-------	----	---------

Route of exposure	Acute local	Acute systemic	Chronic local	Chronic systemic
Inhalation.	6,28 ppm	VND	VND	0,078 ppm
Skin.	VND	VND	VND	18,2 mg/L

#### LEGEND:

VND = identified hazard but no DNEL / PNEC available; NEA = no expected exposure; NPI = no identified danger.

# 8.2 **Exposure controls**

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

### HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

### SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

## RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type B filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

#### **EYE PROTECTION**

Wear airtight protective goggles (see standard EN 166).

### **ENVIRONMENTAL EXPOSURE CONTROLS**

Information on basic physical and chemical properties

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

# **SECTION 9. Physical and chemical properties.**

9.1	1 0	1 1

# **SECTION 10. Stability and reactivity.**

Reactivity

10.1	Reactivity			
	There are no particular risks of reaction with other substances in normal conditions of use.			

# 10.2 **Chemical stability**The product is stable in normal conditions of use and storage.

# 10.3 Possibility of hazardous reactions.

# No hazardous reactions are foreseeable in normal conditions of use and storage.

Decomposition temperature Not available

Viscosity  $1.8 \pm 0.1$ Explosive properties Not available.

# 10.4 **Conditions to avoid.**None in particular. However the usual precautions used for chemical products should be respected.

# 10.5 Incompatible materials.

# 10.6 **Hazardous decomposition products.**Information not available.

## **SECTION 11. Toxicological information**

Information not available.

### **Information on toxicological effects**

### **OIÈ RESSENZA TOPAZ**

Review n. 5 Reviewed 21/05/2021 Printed 21/05/2021 Page 7 di 10

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

Upon contact with skin, this product causes sensitization (dermatitis). Dermatitis derives from skin irritation on the areas which repeatedly come into contact with the sensitizing agent. Cutaneous lesions may include: erythemas, edemas, papules, vesicles, pustules, scurvies, ulcerations and exudative phenomena, whose intensity varies according to illness seriousness

and affected areas. Erythemas, edemas and exudative phenomena prevail during the acute phase. Scurfy skin, dryness,

This product contains sensitizing substance/s and may cause allergic reactions.

Toxicological information about component substances:

ulcerations and skin thickening prevail during the chronic phase.

Substance: ALPHA-HEXYLCINNAMA	LDEHYDE
LD50 (Oral)	3100 Rat
LD50 (Dermal)	>3000 mg/kg Rabbit

#### Substance

# 1,3,4,6,7,8-HEXAHYDRO-4,6,6,7,8,8-HEXAMETHYLCYCLOPENTA-GAMMA-2-BENZOPYRAN

LD50 (Oral)	>3000 mg/kg Rat
LD50 (Dermal)	> 6500 mg/kg Rat
LD50 (Inhalation)	>3000 mg/kg Rat

LC50 (Inalazione) > 2,12 mg/l/4h Rat

Substance:

### 1-(1,2,3,4,5,6,7,8-OCTAHYDRO-2,3,8,8-TETRAMETHYL-2-NAPHTHALENYL)ETHANONE

LD50 (Oral) > 5000 mg/kg Rat LD50 (Dermal) > 5000 mg/kg Rabbit

### **SECTION 12. Ecological information.**

This product is dangerous for the environment and the aquatic organisms. In the long term, it has negative effects on the aquatic environment.

### 12.1 **Toxicity**

ALPHA- HEXYLCINNAMALDEHYDE	LC50	Fish	1,7 mg/l/96h	Fish
HEXAHYDRO-HEXAMETHYL-	LC50	Fish	0,47 mg/l/96h	Lepomis macrochirus
CYCLOPENTA-GAMMA-2- BENZOPYRAN	EC50	Dafnie	0,3 mg/l/48h	Daphnia magna

# 12.2 **Persistence and degradability**

Information not available.
