

		Safety data sheet			
SECTION 1. Identification of the substance/mixture and of the company/enterprise					
1.1	Identification				
	Code:	ESS17022003VER			
	Product name	Olè RESSENZA VERDE			
	Description	Super-concentrated watery mixture of natural and synthetic substances with polyvalent function.			
1.2	Recommended use and restr	ictions on use			
	Use	Professional use only.			
		To be used for detergency, sanitation, deodorization, fragrance giving and dust removal from environments and surfaces.			
		Usage : 1 spray (1 ml) of product in 1 l of water to clean and deodorize any washable surface; 1 spray into drains to neutralize unpleasant odours; sprayed one time on a cloth to dust furniture and frequently used objects.			
		RESTRICTIONS ON USE:			
		DO NOT directly spray it in the environment, but vaporize it from a distance of 20			
		cm on a surface/tissue/water container to minimize the possible insurgence of			
		respiratory allergenic reactions.			
		DO NOT breath the vapour or the aerosol of pure product.			
		It is recommended NOT to use the product for purposes other than those provided.			
1.3	Details of the safety data she	et supplier			
	Name	RUBINO CHEM S.r.l.			
	Full address	Via Vigili del Fuoco Caduti in Servizio, 14/s INT.4			
	District and Country	70026 Modugno			
		tel. (+39) 080 5035348			
		Fax (+39) 080 5008545			
	E-mail of the responsible person for the Safety Data Sheet	customerservice@rubinochem.it_			
	Manufacturer	RUBINO CHEM S.r.l.			
1.4	Emergency telephone number	er			
	Emergency helpline:	United Kingdom: NHS 111 service if you urgently need medical help or advice but it's not a life- threatening situation. For immediate, life-threatening emergencies, continue to call 999.			
SECTI	ON 2. Hazards identification				
2.1	Classification of the substand	ce or mixture			
	subsequent amendments and suppler EC Regulation 1907/2006 and subse	dous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and nents). The product thus requires a safety datasheet that complies with the provisions of quent amendments. ing the risks for health and/or the environment are given in sections 11 and 12 of this			

Hazard classification and indication:

	Skin sensitization, categ	gory 1	H317	May cause an	allergic skin reaction.	
	Hazardous to the aquatic chronic toxicity, category		H412	Harmful to ac	uatic life with long lasting effects.	
.2	Label elements.					
	Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.					
	Hazard pictograms:			-		
	Signal words:		Warning			
	Hazard statements:		<u> </u>			
		H317	May cause an allergi	c skin reaction.		
		H412		ife with long lasting e	ffects.	
		EUH208	Contains: Hexyl Cin Citral, Alpha-Isomet Acetylcedrene, 4-Te	namal, Citronellol, Li hyl Ionone, Linalool,	monene, Eugenol, Amyl Cinnamal, Isoeugenol, Hexyl Salicylate, etate, 2,4-Dimethyl-3-cyclohexene	
	Precautionary statements	Precautionary statements:				
	P102 Keep out of the		ne reach of children.			
	P261		Avoid breathing vapours /spray.			
	P280	Wear protective gloves.				
	P302+P352	Wash with plenty of w				
	P333+P313+P312 If skin irritation feel unwell.		on or rash occurs: Get medical advice / attention. Call a POISON CENTER if you			
	P362+P364	ļ	aminated clothing and wash it before reuse.			
	P501		tents/container in accordance to national law.			
.3	Other hazards. On the basis of available	e data, the produce	ct does not contain any	y PBT or vPvB in per	centage greater than 0,1%.

6.1	Block the leakage if there is no hazard. Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.					
6.2	Environmental precautions The product must not penetrate into the sewer system or come into contact with surface water or ground water.					
6.3	Methods and material for containment and cleaning upCollect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.					
6.4	Reference to otherAny information on pe		d disposal is giver	in sections	8 and 13.

SECT	ON 10. Stability and reactivity.				
10.1	Reactivity				
	There are no particular risks of reaction with other substances in normal conditions of use.				
10.2	Chemical stability				
	The product is stable in normal conditions of use and storage.				
10.3	ssibility of hazardous reactions.				
	No hazardous reactions are foreseeable in normal conditions of use and storage.				
10.4	Conditions to avoid.				
	None in particular. However the usual precautions used for chemical products should be respected.				
10.5	Incompatible materials.				
	Information not available.				
10.6	Hazardous decomposition products.				
	Information not available.				
SECT	ON 11. Toxicological information				
11.1	Information on toxicological effects				
	In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of t substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product. Upon contact with skin, this product causes sensitization (dermatitis). Dermatitis derives from skin irritation on the are which repeatedly come into contact with the sensitizing agent. Cutaneous lesions may include: erythemas, edemas, papule vesicles, pustules, scurvies, ulcerations and exudative phenomena, whose intensity varies according to illness seriousne and affected areas. Erythemas, edemas and exudative phenomena prevail during the acute phase. Scurfy skin, drynes ulcerations and skin thickening prevail during the chronic phase. This product contains sensitizing substance/s and may cause allergic reactions.
